25 March 2025

Australian EXPATRIATE Superannuation Fund

Superannuation and Pension Investment Guide

25 March 2025

'Australia's First Retail Superannuation Fund to regain QROPS status' *

The information in this document forms part of the Australian Expatriate Superannuation Fund [AESF] Product Disclosure Statement [PDS] as at 19 August 2024.

This Part 3 contains a number of references to important information contained in the following guides - [each of which form part of this PDS by way of being incorporated by reference] and should be read in conjunction with this guide:

Part 1 - PDS
Part 2 - AESF Member Guide
Part 4 - Target Market Determination

* HMRC list dated 3 July 2018

Disclaimer

This Investment Guide was prepared by Diversa Trustees Limited (ABN 49 006 421 638, AFSL 235153, RSE License L0000635) the trustee of the Plan [which includes AESF as division VII].

The fund managers of the underlying investments available through the Australian Expatriate Superannuation Fund [AESF] have not been involved in the preparation of the references applicable to their respective funds. The fund managers have not issued, or caused the issue of this Investment Guide. The fund managers are not responsible for the making of any disclosures or the failure to make disclosures in the Investment Guide.

An investment in AESF does not entitle the member to a direct investment in the funds managed by the underlying investment managers and does not represent a deposit with or a liability of the fund managers, their member companies, or the trustees of the underlying funds. AESF is not acting as an agent for these fund managers and the only relationship created by a member making an investment in AESF is the relationship between AESF, the Trustee and the member.

None of the fund managers and trustees of the underlying funds, the Custodian, the Trustee or its advisers guarantees the performance of the investments of the fund or any return of capital or income. Investments in the funds managed by the managers do not represent deposits or other liabilities of a bank or other members of the banking group of which the fund manager may be a member. An investment in AESF is subject to investment and other risks. This could involve delays in repayment, loss of income or principal invested. The fund managers do not endorse or otherwise recommend AESF or guarantee or warrant the performance of AESF or the Trustee. The Trustee alone is responsible for all applications, withdrawals, reports and inquiries relating to investments in AESF.

The Trustee recommends that you consult a licensed financial adviser to assist you in constructing investment strategies specifically suited to your circumstances from the selection of strategies made available by the Trustee of AESF. The information provided in this Investment Guide is general information only and does not take account of your personal financial situation or needs. You should obtain financial advice tailored to your personal circumstances.

Goods and Services Tax [GST]

Please refer to the individual product disclosure statements of each investment fund for details of the charges applied in respect to the investment options offered to members of the Plan. Links to the product disclosure statements can be found on pages 14 to 16 of this Investment Guide.

Important information

1

When you invest in AESF you become a member of the Plan. You may become a member of AESF:

- while your super is in 'accumulation' phase [described in the PDS and this Investment Guide as **Personal Super**]; or
- while your super is in 'pension' phase [described in the PDS and this Investment Guide as **Personal Pension**].

Diversa Trustees Limited is the Trustee of the Plan and the issuer of this Investment Guide.

An investment in AESF is not a deposit or other liability of Diversa, the Custodian or any of the underlying fund managers or their related entities and none of them guarantees the capital or performance of your investment.

An investment in AESF is subject to investment risk, including possible repayment delays and loss of income and principal invested.

The information provided in this Investment Guide is of a general nature and has been prepared without taking into account your objectives, financial situation and needs. You should consider the appropriateness of AESF, having regard to your objectives, financial situation and needs. You should obtain a copy of the PDS for AESF and its supporting Member Guide (whichever is applicable) before making any decision about whether to acquire, or continue to hold, the product. You can obtain a copy of the PDS's and supporting documents from our website at ivcm.com/aesf or by contacting Member Services on 1300 323 489.

The AESF is governed by a Trust Deed. Together with superannuation law, the Plan's Trust Deed sets out the rules and procedures under which AESF operates and the Trustee's duties and obligations. If there is any inconsistency between the Trust Deed and the PDS or this Investment Guide, the terms of the Trust Deed prevail. A copy of the Trust Deed can be obtained free of charge by contacting Diversa.

Diversa relies on a number of third parties for the provision of specialist services in respect of AESF.

Diversa is responsible for the contents of this Investment Guide. Information in this Investment Guide may be updated or replaced at any time.

IVCM [Aust] Pty Ltd	ABN 16 608 923 477 AFSL 491530	Promoter

Section 2

Risks of investing with AESF

2

It is important to remember that generally both super and pensions are long term investments with the aim of either building a nest egg for your retirement or ensuring you will have sufficient funds to pay you a pension throughout retirement. So remember the performance of your investment should be judged over the longer term rather than being influenced too much by short term performance.

If you make a hasty decision and change your investment strategy without having a sound longer term plan, you may do your retirement and/or pension savings more harm than good. We recommend that you talk to your adviser to determine which investment option[s] best suits you.

2.1 Some Key Investment Principles

In considering investment options, matching your time horizon with appropriate investments is critical. Please refer to the suggested minimum timeframe for each investment option. Typically, higher potential returns from investments are compensation for taking on greater risk and the time in an investment is an important dimension in assessing risk. Risk factors such as the risk of capital loss and erosion of returns from inflation are influenced by the type of investment or asset class and the length of time that the investment is held. Each asset class has a different level of expected risk and return as outlined below.

2.2 Asset class risk

In the table below we have detailed how some risks may affect an asset class:

Table 2. Asset class risk

Type of asset class	Description of asset class
Cash	Cash is typically defined as short term fixed interest securities with a maturity date of less than one year. Cash investments offer a low level of risk but are likely to provide the lowest return of all asset classes over the long term
Fixed interest	Fixed interest investments are monies invested in debt securities issued by governments, banks or corporations and are exposed to the credit risk of the issuer of the securities. Fixed interest securities typically pay interest at specified dates and repay the principal amount at maturity. Fixed interest securities typically trade in secondary markets. Tradeable fixed securities that are priced daily show some volatility but of a lesser magnitude than property or shares.
Alternative assets	Alternative assets include market neutral funds, hedge funds, private equity, commodities and infrastructure. Hedge funds use specialist investment strategies that may include shorting, deal arbitrage, exploiting pricing discrepancies, etc. Private equity refers to investments made in companies not listed on a stock exchange. Infrastructure investments include utilities and other essential services such as transportation, water distribution and oil pipelining. Alternative assets would be expected to have a pattern of returns that differs from traditional assets and thus they are expected to provide diversification. Some alternative assets potentially provide relatively stable returns across economic and investment market cycles. Some alternative investments are unlisted and hence are less liquid than listed investments.

Type of asset class	Description of asset class
Property [including property trusts]	Investment in property either directly or via property trusts and managed property funds is typically an investment in commercial, retail, industrial, hotel and residential real estate. Property investments offer returns based on property valuations and a rental income stream. Property trusts can be either listed (i.e. a security tradeable on a stock exchange) or unlisted. Returns rely on general economic factors like inflation, interest rates and employment, as well as location and quality. As a result, property returns are cyclical and relative to fixed interest and cash, property investments have a higher potential return and also carry a higher risk of negative returns over the shorter term. Direct or unlisted property investments are less liquid than trusts which trade on a stock exchange. In some market environments, it may not be possible to redeem from direct property on demand.
Shares	<p>Shares represent part ownership of a company. Shares are typically divided into:</p> <ul style="list-style-type: none"> - Australian based companies; and - International based companies. <p>Owning shares can provide both capital growth and income in the form of dividends. Shares that are "listed" or traded on a stock exchange fluctuate in price whenever there is a trade. The price can move considerably and frequently over the course of a day reflecting changes to general economic factors such as inflation, interest rates and changes in market conditions together with sentiment and the performance of the company itself. Share investments offer a high level of risk and high potential return over the long term compared to cash, fixed interest or property.</p>

2.3 Diversification

Diversification means spreading investments across different asset classes, fund managers and investment strategies. The aim is to reduce the overall portfolio risk. A well diversified portfolio smooths out the returns from the component investments.

A diversified investment portfolio typically falls into one of three categories:

- **growth oriented** - invests mainly in assets aiming to provide a higher return but with higher risk. Typically asset classes include shares, property and some types of alternative assets.
- **growth and defensive mix** - invests in a mix of all major asset classes aiming to deliver a moderate return with a moderate risk level.
- **defensively oriented** - invests mainly in assets aiming to provide a modest return with lower risk. Typically asset classes include fixed interest, some types of alternative investments and cash. Defensively oriented portfolios may also include some growth assets.

NEED HELP?

It's strongly recommended that you consult a licensed financial adviser to assist you in constructing an investment strategy specifically suited to your circumstances from the investment options offered by AESF. Alternatively, contact Member Services on 1300 323 489 for information of a general nature.

2.4 Investment risk

Risk is an inevitable part of investing. Even money sitting in the bank is not entirely without risk. All investors face a number of investment risks. Many factors influence an investment's value. These include but are not limited to – refer to table 3 below.

Table 3. Types of Investment Risks

Type of risk	Explanation of risk
Asset class	The risks that affect each individual asset class. There are five broad asset classes (see section 2.2) and the risks that typically impact each of these classes.
Compliance	The risk that the Fund will lose its complying status and therefore lose its associated tax concessions. We manage this risk by ensuring that the Fund is administered professionally and that it operates in accordance with the requirements of the Trust Deed and super law.
Credit	The risk that an investment option may be affected by another party defaulting on its loan obligations.
Environmental risks	The risk that a natural disaster may impact upon an asset's value.
Exchange	The risk that increases and decreases in the currency of countries in which an investment option invests may affect the value of your investment.
Fraud	The risk that fraudulent activities may impact on, or reduce, your benefits. The Trustee manages this risk by ensuring that the fund managers are insured and by putting controls and safeguards in place.
Inflation	The risk that inflation may exceed the return on an investment.
Interest	The risk that changes in interest rates may have an impact on the value of your investments.
Investment	The risk that a fund manager may withdraw their investment option[s] from the investment menu.
Liquidity	The risk that a lack of demand for an investment makes that investment (or the manner in which it is structured) harder to sell when you want to sell that investment. By way of example, direct investments in the property market have greater liquidity risk in comparison to listed property trusts or the share market.

Type of risk	Explanation of risk
Legislative	The risk that the Government may change laws or regulations which may impact the value of your investments or when you are able to access your funds.
Market sentiment	The risk that international or domestic economic or political factors may trigger a change in the value of your investment.
Political risk	The risk that international or domestic political change may affect the taxation or value of certain assets held.
Specific [or individual investment]	The risk that a particular asset in which a fund manager invests may fall in value due to factors specific to the asset, such as changes to the internal operations of a company. Specific risk is managed by holding a diversified portfolio of assets within one fund.
Currency Exchange	You may potentially subject tax on any gain on Australian dollars (AUD) that arises from a currency exchange movement.

Any investment option[s] you choose may be exposed to any one or more of the above risks and these risks need to be considered when determining the investment strategy that is best for you.

The aim of super is to deliver sufficient funds for your retirement. Saving for retirement is a long term strategy that generally takes the best part of 10, 20, 30 or more years to realise, which is why the performance of your super should be judged over the long term.

It's important not to focus on the returns made in a single year. Instead, try to ride the market's short term highs and lows and stick with your long term investment plans to reach your objectives.

We recommend that you talk to your adviser to determine which investment option[s] best suit you.

Please note that none of the performance of AESF, the repayment of capital or any particular rate of return is guaranteed by the Trustee, the investment managers, service providers or associated companies of the parties mentioned in this booklet. Investment markets do fluctuate. Past investment performance should not be taken as an indication of future performance. If the investment options you choose is/are not right for you, you may not achieve the goals you set.

The investment performance of the underlying investments which make up the menu of the investment strategies presently offered by AESF can be found in the individual fund Product Disclosure Statements. Links to Product Disclosure Statements can be found on pages 14 to 16 of this guide.

All of the underlying investments are collective investment vehicles. The investment returns are net of investment managers' fees and taxes.

Section 3

How we invest your money

3

3.1 Investment manager selection

The Trustee has provided you with a selection of flexible investment options in AESF. You and your adviser are free to select individual investment managers and funds from the menu of investment options offered by the Trustee. From time to time the Trustee may change the available investment options.

The Investment Options offered by AESF are available through the OneVue Managed Account, a registered managed investment scheme ARSN 112 517 656

3.2 Investment manager monitoring

The Trustee together with the Promoter maintains ongoing monitoring of the investment managers and options provided by AESF to ensure that each investment manager's characteristics and consequential performance continue to be in line with expectations.

3.3 About the investment managers

The names of the investment managers that are described on the following pages are listed in table 4.

Product Disclosure Statements for each of the underlying funds can be downloaded from the investment managers' websites listed in the table or in the links provided on pages 14-16.

We recommend you consult these PDSs before making an investment decision.

3.4 Investment in Foreign Currency Funds

Investments may be held in Foreign Currency Funds. All fund reporting and valuations are in AUD. Any payments made out of the fund are always made in AUD regardless of the Investment Fund Currency. Any reported FX gains in AUD resulting from currency movements may be subject to tax.

Investment changes involving changes in investment currencies will be processed using the prevailing foreign exchange rate. Any applications and redemptions made to / from Foreign Exchange Traded Funds will be settled in AUD and therefore will be subject to a foreign conversion.

If you elect foreign Investment Option (except foreign Cash Investment Options) please note you will incur foreign exchange conversion fees. Foreign Exchange Traded Funds can only be purchased using AUD which will be converted on settlement to the currency of the Investment. The same will apply to sales, foreign currency at settlement will be converted to AUD prior to depositing the amount to Cash Hub.

www.spglobal.com

Please note that the Trustee has discretion to change investment managers from time to time. You will be notified if this occurs.

3.5 Using the order pad via your Secure Online Portal account

Members and authorised advisers may invest funds on their own through the use of the order pad via the Secured Online Portal.

Upon receipt of the member's QROPS or Super funds and meeting all the requirements including submission of the ATO tax election form, funds will be allocated to your Cash Hub account. From the cash hub account, you can elect to invest in any of the options as stated in this Investment Guide. You may also manage switches via the portal at any time. You may submit a manual switch request by completing a Switch form which will be available by contacting the Member Services on 1300 323 489. A switch fee will apply when submitting a manual switch request. Please refer to the Fees and Costs Section of the Product Disclosure Statement.

3.6 Socially Responsible Investing

The underlying investment managers may have their own policy on the extent to which labour standards or environmental, social or ethical considerations are taken into account when making investment decisions. Whether a manager has such a policy, or the contents of such a policy, is not mandated by the Trustee when selecting or monitoring managers. We do not currently require any managers we appoint to take any such considerations into account when making their investment decisions.

3.7 Investment strategies in detail

To help you determine which investment options are best suited to your circumstances you should refer to the individual fund Product Disclosure Statements. If you are unsure of which options suit you best we recommend you consult a licensed financial adviser to determine the investment strategy that best suits your needs.

3.8 Standard Risk Measure

When determining the risk level of each of the investment options, the Trustee has adopted the Standard Risk Measure approach. Please refer to the individual fund Product Disclosure Statement / Factsheet for details of the standard risk measure.

The Standard Risk Measure is based on industry guidance to allow you to compare investment options that are expected to deliver a similar number of negative annual returns over any 20 year period.

The Standard Risk Measure is not a complete assessment of all forms of investment risk, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than you may require to meet your objectives. Further, it does not take into account the impact of administration fees and tax on the likelihood of a negative return.

You should ensure that you are comfortable with the risks and potential losses associated with your chosen investment options.

The Standard Risk Measure is set out in table 5 below.

Table 5. Standard Risk Measure

Risk Band	Risk Label	Estimated number of Negative Annual Returns over any 20 Year Period
1	Very Low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to Medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to High	3 to less than 4
6	High	4 to less than 6
7	Very High	6 or greater

3.9 Investment options - investment manager details and options listing

Pages 14-16 outline the approved investment options available to members of AESF. A link to the Product Disclosure Statement is provided for each approved investment option.

3.10 Investment Fee

This fee is charged by the investment fund managers and may be a different fee for each investment option. Please refer to the individual fund Product Disclosure Statement for this information.

3.11 Other Fees

Please refer to the individual fund Product Disclosure Statement / Factsheet for details of the investment fee rates for each investment fund.

Please note - investments in an Exchange Traded Fund (ETF) will incur a brokerage fee. For an Australian ETF, the minimum fee is the greater of \$22 (including GST) or 0.11% (including GST).

A brokerage fee of 0.33% applies to each GBP & USD ETF.

3.12 Investment performance

To view the most recent investment performance information please visit the **investment fund websites**. Please note that while historical performance shows how an investment option has performed in the past, it is not an indication of how it may perform in the future. Performance of an investment option may vary over time.

3.13 Cash Hub

Members will be required to maintain a minimum cash balance in 'Cash Hub'.

How the Cash Hub works

The Cash Hub is an interest-bearing transaction account which holds your available cash for investment in the Investment Options as you choose. You may earn interest on your cash whilst monies are held in the Cash Hub. The interest earned is variable and rates are available in the Secure Online Portal. The Cash Hub is used for:

- settling purchases and sales for investments,
- collecting income from your Investment Options,
- executing deposit and withdrawal requests (provided you have met a condition of release),
- paying for selected corporate actions, and
- paying your tax, insurance premiums, fees and charges and any other deductions.

To invest in any Investment Option, you must have a Cash Hub open at all times and maintain the minimum balance required (see below). You can sell assets to maintain this balance. Refer to the Part titled "**Topping up the Cash Hub**" for more information. Liquidity will be processed by the Fund Administrator if the funds are below the minimum cash hub balance. We will initiate a sell down of assets to maintain the minimums.

Minimum Cash Hub balance

The minimum balance is currently \$2,500 plus:

- three-months' pension payments if you have a Pension Account, or
- three-months' insurance premium payments if you have Insurance in place.

You must have available cash in the Cash Hub before placing investment instructions. The available cash will be calculated and displayed on Secure Online Portal and amended when the information we receive changes. Your available cash displayed on the Secure Online Portal is your Cash Hub balance minus the required minimum Cash Hub amount. Cash held in any account outside of your Cash Hub (including foreign currency) is excluded from the calculated minimum Cash Hub balance.

You can only transfer available cash from your Cash Hub. Proceeds from the sale of investments can take time to be processed and may not be immediately available for you to transfer.

Topping up the Cash Hub

You can monitor the Cash Hub balance via the Secure Online Portal. If the balance is below the minimum level, we may restore the minimum balance by selling investments in your Account in the following order:

- first, AUD Cash Investment option,
- second, GBP or USD cash Investment option; starting from the highest value,
- third, Australian Domicile Investments, starting from the highest value,
- lastly, Foreign Domicile Investments, starting from the highest value.

IMPORTANT: Cash held in the Cash Hub through your Accumulation or Pension Account is not covered by the Government Guarantee (Financial Claims Scheme).

3.14 Investment Option details

Each investment option relates to a different underlying managed fund with different underlying investment managers. Members can choose any one or more of the investment options in any of the investment or asset classes, and investment manager[s]. For more detailed information in respect to the individual investment options that follow, please refer to the investment manager's Product Disclosure Statement available on each investment manager's website listed in Table 4 on page 9.

For convenience the asset allocation of each of the investment options have been illustrated under the following asset classes:

1. Cash

2. Australian Fixed Interest

3. International Fixed Interest

4. Australian Shares

5. International Shares

6. Property

7. Alternatives

8. Other

3.15 Holding Limits

The Trustee may set a holding limit on a managed fund or ETF approved to the Investment Menu of the fund. The approved holding limit of each investment fund is stated in the investment profiles, Section 4, pages 14 to 17 of this Investment Guide.

For example, if you hold a balance of \$100,000 & you select a fund from the Investment Menu with a holding limit of 20%, the maximum amount you will be approved to invest in that option is \$20,000.

Please refer to the underlying investment Prospectus for each of the individual ETP's for further information.

Please note that past performance of any investment should not be considered as an indication of its future performance and that investments can go down as well as up.

Section 5

What else do you need to know about investment?

5.1 How your values are calculated

Your balance is made up of a number of investment unit holdings in each of your chosen investment options.

5.2 What are units?

An investment unit provides a measure of your share of a given investment unit option. It's determined by dividing the net assets of each investment unit option into units of equal value. Units are not transferable.

5.3 Calculating investment prices

The investment manager[s] you have chosen will calculate investment unit prices on a daily basis, up to five decimal places.

Where a discrepancy exists between the allocation or redemption of units and the amount to be paid or received, the investment manager[s] may issue or redeem a fraction of a unit as appropriate. A fraction of a unit is equal to the value of the proportion it represents of the unit as a whole.

An allowance for the investment fund's buy/sell spread should be considered in fund purchases and sales. Any rise or fall in investment prices is dependent on the fluctuations of the of the investments in each investment option.

5.4 Which investment price will be used to process your transaction?

When a contribution is made, units in the respective investment options are allocated by the Trustee at the buy price. When disinvestments are made to cover the cash out balance or to cover payment requests out of the fund investment units in the respective investment options will be sold by the trustee at the investment sell price. The units will be priced on the date that the administrators process the transaction.

The investment manager[s] can only allocate unit prices once it receives all information necessary to invest from the Trustee on your behalf. As a result, the investment manager[s] reserves the right to suspend the trading of units at times when it feels it is unable to calculate unit prices in a manner that is equitable to all unit holders holding units in a specific investment option.

Please note that generally investment manager[s] reserve the right to suspend the redemption of units in the event of significant market movements and or where they are unable to realise enough of the underlying assets of a particular investment option.

5.5 Switching your investment options

Once you have selected your investment options, you can change them at any time by logging in via the Secured Online Portal. A switch will be affected as soon as reasonably practicable upon processing a valid investment switch. There are no administration charges applicable with respect to investment switches when submitted via the Online Portal. You may submit a manual switch request by completing a Switch form which will be available by contacting the Member Services on 1300 323 489. A switch fee will apply when submitting a manual switch request. Please refer to the Fees and Costs Section of the PDS.

Investment switches are processed using the sell [or exit] price of the fund being sold and the buy [or entry] price of the fund being purchased. A buy/sell price differential may apply, which is representative cost to members in buying and selling of underlying assets with respect to the chosen investment option[s]. Foreign Exchange may be applicable.

5.6 Changes to investment options

The Trustee may, in its discretion from time to time, change the available investment options and add or remove investment options. The Trustee may also switch your investment options as a result of any changes. You will be provided with written notice of any changes to investment options, if this affects you directly.
