

Target Market Determination Netwealth Managed Account Service

28 February 2025 Version 7.0 (current)

About this document

This Target Market Determination ('TMD') for the Netwealth Managed Account Service ('the Managed Account'), is issued by Netwealth Investments Limited ABN 85 090 569 109, AFSL 230975 ('Netwealth', 'we', 'us' or 'our'). This TMD seeks to provide distributors with an understanding of the class of consumers for which the Managed Account has been designed. This document is not a summary of the product features or terms of the Managed Account. The information in this document is general advice only, and the TMD has been prepared without taking into account any persons' objectives, financial situation or needs. Persons interested in acquiring this product should read the Product Disclosure Statement ('PDS') for the Managed Account before making a decision whether to buy this product.

Important terms used in this TMD are defined in the Target Market Determination Definitions ('TMD Definitions') document, which supplement this document. The TMD and the TMD Definitions document can be obtained on our website netwealth.com.au.

Product Description

The Managed Account provides investors with access to professionally managed investment portfolios in the form of Managed Models ('models'). Each model is managed by a professional investment manager ('Model Manager'). The Managed Account can be invested in using the Netwealth Wrap Service or the Netwealth Superannuation Master Fund.

The key attributes of the Managed Account are:

- Investment choice: Investors can select from a menu of models with a range of investment options and strategies.
- Professional investment management: The investments of each model are reviewed and rebalanced based on the decisions of the appointed Model Manager.
- Transparency and control: Investors can see what investments are held in their
 account, set certain investment preferences and, if they decide to change
 models or withdraw from the Managed Account, they can generally retain or
 trade the underlying assets to suit their own needs.

Issuer/responsible entity:

Netwealth Investments Limited

ABN 85 090 569 109 AFSL 230975

Product details:

Netwealth Managed Account Service

ARSN 633 923 887

Description of Target Market

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (typically with an intended product use of satellite/small allocation or core component). In such circumstances, the product should be assessed against the Consumer's Attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product with a High or Very High risk/return profile is consistent with the consumer's objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is Low or Medium. In making this assessment, distributors should consider all features of a product (including its key attributes).

Greater than one year of request	•	and refer to the 'Investment risk' section in Part 1 of the PDS which explains liquidity risk.

Consumers other requirements

Consumer's investment objective	TMD Indicator	Product description including key attributes
Timely adjustment of portfolio		The consumer seeks a product that enables a directly held portfolio to be monitored and adjusted in a timely and efficient manner by an investment adviser.
Management of tax position	•	The consumer seeks a product that enables the tax position of the consumer to be optimised or actively managed. This could for example include the selective realisation of gains and losses in a portfolio to reduce capital gains tax (CGT) liabilities, and the quarantining of the consumer's tax position from the tax position of other investors in the same product.
Visibility of investments in portfolio	•	The consumer seeks a product that provides the consumer with visibility of the investments in the portfolio.
Customisation of portfolio	•	The consumer seeks a product that provides the flexibility to add or remove investments from the portfolio. The customer or adviser may include or exclude investments (or categories of investment) for example to implement ESG filtering, for tax reasons, for changing the regularity of income, or to accommodate existing investments.
Transfer of existing investments into portfolio	•	The consumer seeks a product that permits existing investments to be in specie transferred into the product, with the retention of direct ownership. These prior investments would then be managed inside the product in accord with the management of the whole managed account. The consumer may seek this option to reduce tax, brokerage and other transaction costs.

Appropriateness

Netwealth has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market. Netwealth has formed this view as the features of this product in the 'Product description including key attributes' sections are likely to be suitable for consumers with the attributes identified with a green TMD Indicator.

Distribution conditions/restrictions

All prospective consumers must receive the Product Disclosure Statement in Australia.
